Subject: RE: SPI-Anderson call tomorrow

Shaheerah:

Sounds good.

To clarify, painting of new machinery manufactured in the fabrication shop is the only non-maintenance, onsite painting operation. However, the fabrication shop produces individual pieces of specialty equipment, and is not an assembly line operation where paint is constantly applied.

Thanks.

Eric

Eric,

Thanks for the information and confirmation of the phone call. I will call you directly and have Shane conferenced into the call.

Subject: SPI-Anderson call tomorrow

Shaheerah:

I know you had a list of topics you wanted to cover, but I can provide some information on the items you raised this morning.

The existing boiler will be decommissioned and dismantled after the new cogeneration unit is up and running. While the new unit is going through shakedown and commissioning, there will be periods when both units are operating, but the new unit will not be generating electricity during those periods.

There are eight existing kilns at the facility, and the cogeneration unit project does not include any new kilns.

There is painting associated with routine maintenance operations, and construction of the cogeneration unit will include painting, but there are no ongoing painting operations at the facility.

I think it will save time if we have Shane Young, the manager of the Anderson facility, on our call tomorrow at about 2:15 PM PDT. I can set up a call-in number for us all to use, or I can conference Shane in after you call me. Let me know what works best for you.

Thanks.

Eric
